APPLICATE: VENTER, J. Craig et al.

TITLE OF INVENTION: POLYMORPHISMS IN HUMAN G-PROTEIN COUPLED

TITLE OF INVENTION: RECEPTOR GENES ASSOCIATED WITH DISEASE, METHODS OF DETECTION

TITLE OF INVENTION: AND USES THEREOF

FILLE REPERENCE: CLO00848

CURRENT APPLICATION NUMBER: US/09/949,004

CURRENT FILING DATE: 2002-12-20

PRIOR APPLICATION NUMBER: 60/232,045

PRIOR APPLICATION UNDER: 60/232,045

PRIOR FILING DATE: 2000-09-13

NUMBER OF SEQ ID NOS: 6961
TITLE OF INVENTION: HUMAN GENOME-DERIVED SINGLE EXON NUCLEIC ACID PROBES USEFUL PC
TITLE OF INVENTION: ANALYSIS OF GENE EXPRESSION IN BT 474
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      2830 TTGGCGGGAAATCGTGTGAGCAGTGATGGATGGCTTGCCTTCATGGGTGTATTTGAGAAT 2889
